

Domain : E-Commerce - Flow

- Project size : (Around 20 team members) Large Team
- Size : 11 - Developers,6 Testers (6- Backend Developer,5- Front End Developer,4- Manual Tester and 2 Automation Tester),1-Team Lead ,1- SM,1-BA (Not mandatory to mention in your CV)
- Sprint : 2 weeks (1st June 22 till 14th June 22-example)
- Bug reporting tool : Jira
- Test cases writing techniques : Black Box technique (BVA, EP,etc)
- Critical bugs---??
- US-As per the complexity and length of the US then we take in sprint (US3-US4-US5-US6-us7-us8 etc)
- Process-Agile-Scrum
- Sequence-Dev-QA-Stage/preprod/uat--production/live
- Challenges/Risk-
 - 1.Getting build late from developers(This discuss in scrum meeting and then we get it)
 - 2.Requirement change sometimes(Not frequest-once in 4 -5 month thats doable)
 - 3.Sometimes not enough time to execute regression suit (Sanity suit run)
